

AUTHENTI COIN

WHITE PAPER

The Decentralized Crypto Token

V 1.0

EXECUTIVE SUMMARY

Blockchain is a digital, decentralized, public ledger used for all cryptocurrency transactions. It was first designed to support the processing and transaction of bitcoin, the world's largest digital currency. Other uses of the technology can be built using Smart Contracts to handle digital assets in several different industries. 10% of global GDP (about \$7.4 trillion) is estimated to be kept on blockchain platforms by 2025, according to a World Economic Forum report. The number of wallets has seen a dramatic increase in the last few months, making it possible for the first time to have a truly global store of value.

Authenti Coin is intended to add value to the life of a normal user. Unlike other crypto coins, which are highly volatile, Authenti Coin comes with a plan to control this aggressiveness. To provide liquidity, and to keep the flow of exchange smooth as new user joins the network, we have locked the tokens for 3 years. After three years, the coins will be released periodically to maintain the liquidity. This mechanism helps stabilize the coin and bring the price of Authenti coin down.

Authenti Coin has promised to give rewards to new and existing token holders who trade within the Authenti Coin network. After 90 days, there will be a 7% fee. 2% will go back to the holders and 2% to the liquidity pool. 3% will be used for promotion, and advancement of the coin.

We are planning to lock the remaining 3% and hold for 2yrs. We've seen many tokens perform well in the beginning, but within a few months, they start to vanish because of

Whale holders. We have planned to provide opportunity and time to token holders. Authenti Coin will have a fee of 7% outside of the network and 1.5% inside the network.

The market value of Authenti Coin solely depends upon the number of people who buy it or sell it. It's version 1.0 has to see a lot of improvement in the coming days and will become more stable over time. The team believes that we should be transparent and declare the potential risks involved. Like any other crypto coin out there in the market, Authenti coin may also be volatile.

We don't want it to be unstable. Authenti Coin leverages a distributed peer-to-peer consensus network that cryptographically helps in securing every transaction. We are in contact with a few designers and manufacturers to create a blockchain based payment device just like a credit card machine. We want to have a legitimate crypto card that will also function as a Credit Card but it will be working on the basics of blockchain and will be able to make payments with a cryptocurrency.

Authenti Coin will have its own exchange, Android and iOS apps, Credit card and ATM machine, and credit card. We are also working on expanding Authenti Coin to emerging markets. We also have plans to create a hardware cold storage device with our own wallet.

INTRODUCTION

The rise of the blockchain is considered one of the hottest topics in today's tech market. It is a digital, decentralized, public ledger used for all cryptocurrency transactions. Once each transaction is completed, it is added to previously completed blocks in the chronological order of when each block was added to the chain, forming a blockchain. Integrating decentralization as a major component of the blockchain economy empowers members of complicated networks to collaborate without the necessity of the presence of centralized authority or middlemen. This helps to boost productivity in many ways, lowering transaction costs and other forms of inefficiency that exist while doing business with these agents.

Despite having been first designed as the infrastructure for supporting the processing and transaction of bitcoin, the world's largest digital currency, its usage has now grown well beyond that. Other uses of the technology can be built using Smart Contracts to handle digital assets in several different industries. Blockchains are viewed as having the ability to transform the global financial system and other industries by disrupting the current structure of intermediaries. A report conducted by the World Economic Forum projects that blockchain technology would alter financial services, with 10% of global GDP (about \$7.4 trillion) estimated to be kept on blockchain platforms by 2025.

Bitcoin (and cryptocurrency mining) shot up to an all-time high of about USD 20,000 in 2017, both due to its surge in price and the expansion of crypto mining, where the prospect of "free money" drew in a wave of enthusiasts throughout the world.

CRYPTOCURRENCY MARKETPLACE

Over the past year, the use of cryptocurrencies, such as crypto tokens and other digital assets based on blockchain technology, has seen a period of rapid growth. Blockchain technology makes it possible for the first time to have a truly global store of value, and the number of wallets has seen a dramatic increase in the last few months. At the beginning of 2017, Bitcoin was at the top of the cryptocurrency world with a market capitalization of 12 billion US dollars. On paper, Ethereum was worth 700 million USD while it was still a relative newcomer to the cryptocurrency market. To start the year, Bitcoin's market value rose from 12 to 32 billion USD in just a matter of weeks. Ethereum also experienced an explosive rise during the first two months of the year, and as of April had a market value of 28 billion USD.

The market is enthused by blockchain technology and the decentralization of currency that blockchain technology and cryptocurrency provide. It is estimated that well over 4000 different cryptocurrencies currently exist, and each has a new use case for blockchain being created on a near-weekly basis. Selecting the correct cryptocurrency is

essential, as there are important things to consider including checking if there is anything wrong with the team, the technology, or the concept.

AUTHENTI COIN – INTRODUCTION

Authenti Coin is a new crypto venture by a group of experts. It's a new addition in the pool of thousands of already existing cryptocurrency coins and tokens. But this is more than a normal crypto coin. Authenti coin is actually intended to add value to the life of a normal user. The goals of Authenti Coin are revolutionary and team is work hard on achieving those goals. These plans will surely impact the lives of normal people. It is creating revolution I the field of Cryptocurrencies, credit cards, and the payment methods that are used to pay for goods and services at grocery stores, merchant shops, nightclubs, and gas stations.

Unlike other crypto coins, which are highly volatile and their value keeps increasing and decreasing, Authenti Coin comes with a plan to control this aggressiveness of the coin. It supports both the long-term and short-term holders of the token and keeps the coin safe from Whale holders who try to decrease the value of the coin within a few months of its launch.

Because Authenti Coin is built on trust, we want to demonstrate our vision to our holders and invite them to join us on this journey. We worked on this project to create a token

that is both practical and useful. We will demonstrate the changes and development we intend to implement in the next months. Typically, within the first 90 days, many new tokens are targeted by whale holders, pulling the token down, topping its progress, and leaving others in a difficult spot. This token will provide time for both new and existing holders to grow.

Authenti team has already burnt 96% of the total tokens. To provide liquidity, and to keep the flow of exchange smooth as new user joins the network, we have locked the tokens for 3 years. After three years, the coins will be released periodically to maintain the liquidity. This mechanism helps stabilizing the coin and bring the price of Authenti coin down. It also brings liquidity to the token.

We are planning to lock the remaining 3% and hold for 2yrs. 1% will have periodic releases. 20% will be released within 4 months, and the next 20% will be released after 3 months. Then we will release 40% after 3 months, and finally, the remaining 20% will be released within the period of next 2 months.

TRANSPARENCY

At Authenti, we want to make this coin successful and bring an actual change. To achieve this, we have brought a transparent plan. We've seen many tokens perform well in the beginning, but within a few months, they start to vanish because of Whale holders. To lessen the impact of Whale holders, we have planned to provide opportunity and time to

the token holders. We have provided a rotation period of 90 days, where new holders join the community and the older ones start trading the token.

REDISTRIBUTION REWARDS

Authenti Coin has promised to give rewards to our new and existing token holders who trade within the Authenti Coin network. Our fee is minimal. Most of our token holders get tokens from redistribution done by short-term holders. To keep the transparency, to provide equal opportunities, and maintain the liquidity, we have divided the redistribution period into four different categories. Here is how our redistribution system works for the original deposit for the 1st 90 days.

- ❖ **Within the Network:** The total fees will be 1.5%. 1% will be distributed back to holders, while the remaining 0.5% goes to the liquidity pool.
- ❖ **Outside the Network:** The total fees will be 15%. 10% will be distributed back to holders, while the remaining 5% goes to the liquidity pool.

After 90 days, there will be a 7% fee. 2% will go back to the holders and 2% will go to the liquidity pool, while the remaining 3% will be used for promotion, and advancement of the coin. This is illustrated below.

Fee and Funds Allocation for 1st 90 Days – Original Deposit

Days	 Tax/Fee	 Redistribution	 Liquidity Pool	 Authenti Coin
30 Days	15%	10%	5%	0%
31 – 60 Days	15%	10%	5%	0%
61 – 90 Days	15%	10%	5%	0%
90+ Days	7%	2%	2%	3%

For above original Deposit transactions, there are again 4 different categories based upon the number of days of holding the coin. This distribution is follows as:

- ❖ **First 30 days:** The total fees will be 65%. 50% will be distributed back to holders, while the remaining 15% goes to the liquidity pool.
- ❖ **31st to 60th day:** The total fees will be 45%. 35% will be distributed back to holders, while the remaining 10% goes to the liquidity pool.
- ❖ **61st to 90th day:** The total fees will be 25%. 20% will be distributed back to holders, while the remaining 5% goes to the liquidity pool.
- ❖ **90+ days:** Regular transaction fees are followed as outside the network. There will be a 7% fee. 2% will go back to the holders and 2% will go to the liquidity pool, while the remaining 3% will be used for promotion, and advancement of the coin. Within the network, there will be only a 1.5% fee.

Same has been illustrated below for your ease.

Fee and Funds Allocation for 1st 90 Days – Above Original Deposit

Days	 Tax/Fee	 Redistribution	 Liquidity Pool	 Authenti Coin
30 Days	65%	50%	15%	0%
31 – 60 Days	45%	35%	10%	0%
61 – 90 Days	25%	20%	5%	0%
90+ Days	7%	2%	2%	3%

If the original fund has already passed 90 days with the sender, then the receiver won't have to wait for another 90 days. If the 90 days period has not passed yet, then the receiver will also need to wait for 90 days. Another option will be to get hit with the 90 days fees explained above. They would get hit with only a 1.5% fee when internal transfer within the coin network. We have kept these 90 days constraint only to protect our holders.

WHY AUTHENTI COIN?

From an investor's point of view, a question arises: why buy and trade with Authenti Coin at the start of its launch? Why not wait for some time to let it be stable?

The simple answer to this question is that currently, the prices per token of Authenti Coin are low and one can buy more tokens for less money. Once more people know about this adventure, they will buy it. It will be used for transactions. So, the prices per Authenti Coin token will automatically become higher. So, it is wise to invest in Authenti Coin at the very beginning of its launch since the prices are lower currently.

At Authenti Coin, we offer:

- ❖ Delivery reports
- ❖ Open Wallet
- ❖ Marketing plan
- ❖ Planning for launching of our own exchange in 2023
- ❖ Plan for our very own decentralized ATM machine and Credit card machine.
- ❖ Blockchain based credit card that is secure and faster than normal credit cards
- ❖ We are planning to facilitate our community through launching credit cards, and credit card machines so people can use them to pay for goods and services actually using the Blockchain technology and take real advantage of cryptocurrency.

RISKS

Authenti Coin provides a lot of benefits to the investors, but on the other hand, it is not out of risk. At Authenti Coin, our team believes that we should be transparent and declare the potential risks involved in Authenti Coin.

Like any other crypto coin out there in the market, Authenti Coin is also volatile. We cannot control it. The market value of Authenti Coin solely depends upon the number of people who buy it or sell it. As of now, Authenti Coin cannot be mined or earned any other way than bought. It's version 1.0 of Authenti Coin, it has to see a lot of improvement in the coming days. The market value of Authenti Coin tokens may be highly volatile at the start but we can guarantee that it will become stable over time. We don't want it to be unstable. We don't want it to be the next USDT either, with no volatility. Besides these risks, if one is an expert in trading crypto or using it, they can time the market, buy the Authenti Coin, hold it, wait till its value becomes high, and sell it.

Regulatory Risks

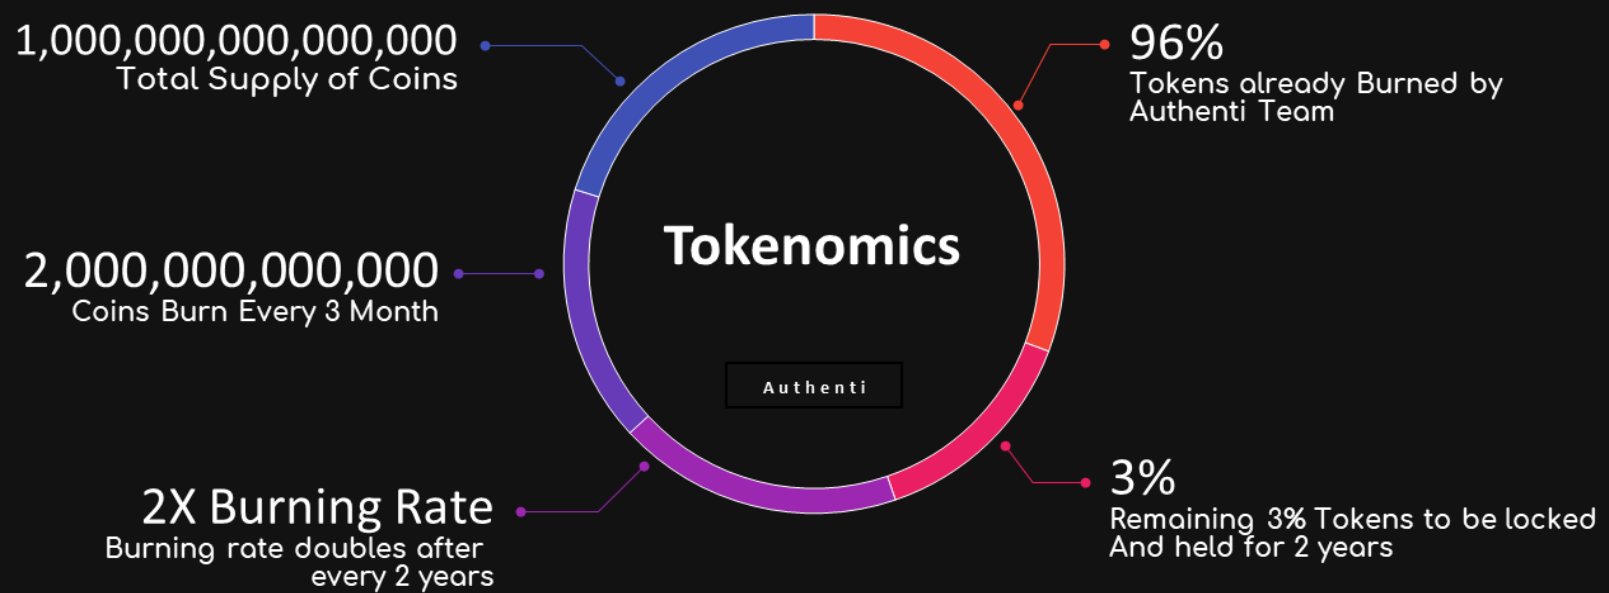

The blockchain industry is in the initial stage of its regulation. Governments of countries are in the process of studying blockchain technology, and some countries impose restrictions (for example, the United States, China, South Korea).

No legal documents are regulating the crypto industry yet - the laws can appear later and can significantly affect the activities of blockchain projects, including our project. We warn you that such laws can significantly limit and even stop the project activity, we are not responsible for the negative consequences associated with the possible regulation of the industry in the future.

TOKENOMICS

There is a total supply of 1,000,000,000,000,000 (Quadrillion) coins. Every 3 months, 2,000,000,000,000 (Trillion) coins get burned and this number doubles every 2 years. For example, in the 2nd year it will burn 4 trillion coins, and 2 years later it will be burning 8 trillion coins every 3 months.

KEY FEATURES OF AUTHENTI COIN

Some key features of Authenti Coin are:

- ❖ Secured and safe: Authenti Coin leverages a distributed peer-to-peer consensus network that cryptographically helps in securing every transaction.
- ❖ Quick transfer: Instant fund transfer globally is available with the help of fast block execution unlike traditional remittance, unmatched speed, and payment processors.
- ❖ Decentralized: Direct transactions among network participants without the presence of a central facilitator are enabled with the help of decentralized technology.
- ❖ Easy to use: User-friendly interface intended for seamless Real-world use cases.
- ❖ Scalability: Assures scalability for pacing up with the industry's transaction requirements, thereby facilitating mass adoption of cryptocurrency.

FUTURE GOALS

Right now, we have crypto companies with cards for crypto but it is a little misleading. We want to bridge the gap. We're planning on working with manufacturers in two folds. Firstly, we want to have a legitimate crypto card that will also function as a Credit Card

but it will be working on the basics of blockchain and will be able to make payments with a cryptocurrency. We are already in contact with a few designers and manufacturers to create a blockchain based payment device just like a credit card machine. We have prepared the design and planned its safe and secure working.

We also have plans to create a hardware cold storage device with our own wallet as well as apps for handling exchanges, payments, transfer of funds, etc. We are also working on expanding Authenti Coin to emerging markets. With Blockchain this will bring an immense opportunity. These machines will be able to be used at merchant stores and people will be able to pay safely and securely via cryptocurrency.

We will also make this wallet public. Members will be able to see about the net worth in the wallet. We will keep updating about our moves and plans for Authenti Coin and holders.

ROADMAP

June 2021

September 2021

January 2022

Beginning of ICO

Marketing and Listing on Exchanges

Android and iOS app release

Launching of ICO and Funding Phase

Bringing Awareness about opportunity and listing on exchange

First app to be released on Android and iOS Platforms

July 2022

April 2022

October 2022

January 2023

March 2023

Release of Hard Cold Wallet

Beta Testing for Payment Machine

Release of Payment Machine

Building own Exchange

Release of Hard Cold Wallet with its Application

Payment machine beta testing on limited locations and working on building ATM Machine

Credit card machine to work with merchants and accept payments

In March 2023, we will start building our own Exchange

CONCLUSION

Authenti Coin brings innovation, and tries to keep the coin stable by introducing 90 days threshold period. It not only supports existing holders, but also hold hands of new holders. Authenti Coin bring transparency and liquidity in the coin. It is planned to launch Authenti Coin's very own exchange, Android and iOS apps, Credit card and ATM machine, and credit card. This will bring innovation and will open the doors for a new World in blockchain manner.
